

Hourly Employee Guide: Accurate Timekeeping

As an hourly (overtime-eligible) employee, you are a **positive time reporter** and must record all paid time worked, including overtime hours. This guide provides information to help you accurately report time. Bolded terms are defined in the "Definitions" section on the second page.

Visit the University of Arizona [Fair Labor Standards Act and Overtime Policy](#) and [Salary vs. Hourly page](#).

How To Report Time

Time is recorded using the [UAccess Time tile](#) (NetID login required). Follow the steps on the [Positive Reporters page](#) for complete guidance.

Understanding Overtime

The Fair Labor Standards Act uses the term "nonexempt" in reference to hourly employees. That means that you are not exempt from being paid for all hours worked, and are eligible for overtime pay.

Overtime refers to hours worked beyond an hourly employee's **regular hours**. All overtime must be approved by your supervisor/time approver prior to being worked. Review the "Definitions" section below for more information about how overtime is paid.

A Supervisor Can	A Supervisor Cannot
Require you to work more than your regular hours in a workweek.	Ask you to clock out and continue working.
Prohibit you from working more than your regular hours	Pressure you into an unspoken "don't ask, don't tell" situation in which you implicitly know you are expected to work more than your regular hours without overtime pay.
Require you to receive approval before working more than your regular hours in a workweek.	Prevent you from being compensated for overtime, even if you worked more than your regular hours without prior approval.
Require you to be compensated with either compensatory time or pay.	Make it more difficult to use compensatory time compared with other accrued time off.
Prohibit or limit paid rest periods if not established college or division practice.	Require you to work an 8-hour workday without an uninterrupted meal period of at least 30 minutes (unless there is a specific departmental exception).
